SCHIERLE

SOUTH AFRICA

70 YEARS
1955 - 2025

WHO IS SCHIERLE?

About Schierle

Founded in 1955 by Eduard Schierle in Düsseldorf, our family business has built a trusted reputation for excellence in the trade, processing, and machining of steel and stainless steel tubes, cylinder tubes, piston rods and hydraulic line tubes. Today, we remain a reliable partner to industries worldwide, driven by a commitment to quality and innovation.

In partnership with Ferrotrade International, Schierle predominantly served the South African OEM industry since 1989. In 2016 Schierle partnered up to purchase Ferrotrade, to eventually acquire the remaining shares in 2025. Currently Ferrotrade International retains it's registered name, yet trades under Schierle - South Africa.

Our Vision for Growth

We are seeking investment to accelerate our growth through strategic mergers and acquisitions and a comprehensive digital transformation, internally as well as externally. By unlocking new operational efficiencies and expanding our market presence, we aim to create significant value for our stakeholders while maintaining the quality and reliability that define Schierle.

Why work with Schierle

Strategic Opportunities:
A globally unique product range and in-house processing capabilities position us to capitalize on emerging market needs and growth opportunities.

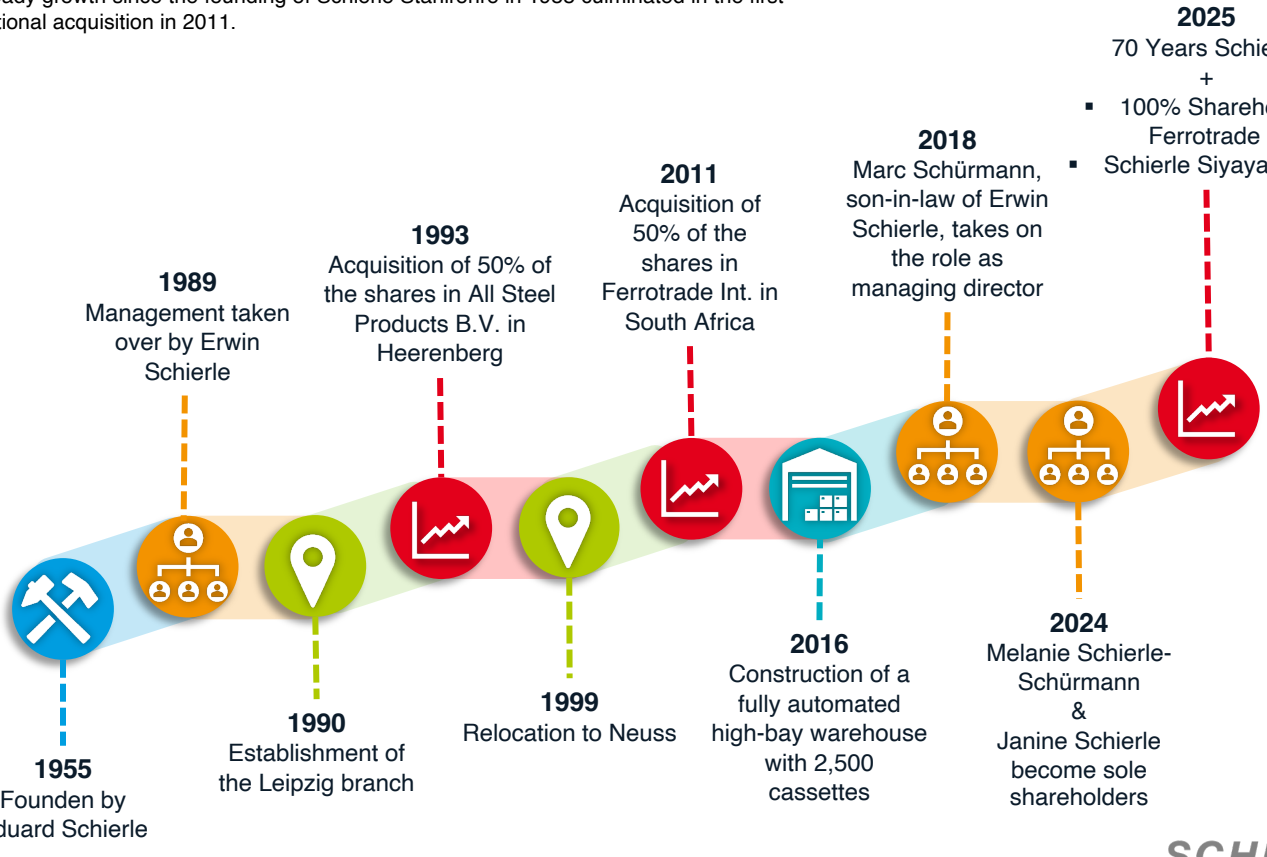

Proven Stability and Innovation:
70 years of experience combined with a forward-thinking approach make us agile and resilient in a changing business landscape.

Technological Advancement:
Investments in digital transformation will enhance operational efficiencies, scalability, and customer engagement.
At Schierle, we see change as an opportunity to strengthen our business and deliver exceptional value to our partners.

Join us and profit from the next chapter of our family business's legacy.

OUR COMPANY HISTORY

The steady growth since the founding of Schierle Stahlrohre in 1955 culminated in the first international acquisition in 2011.

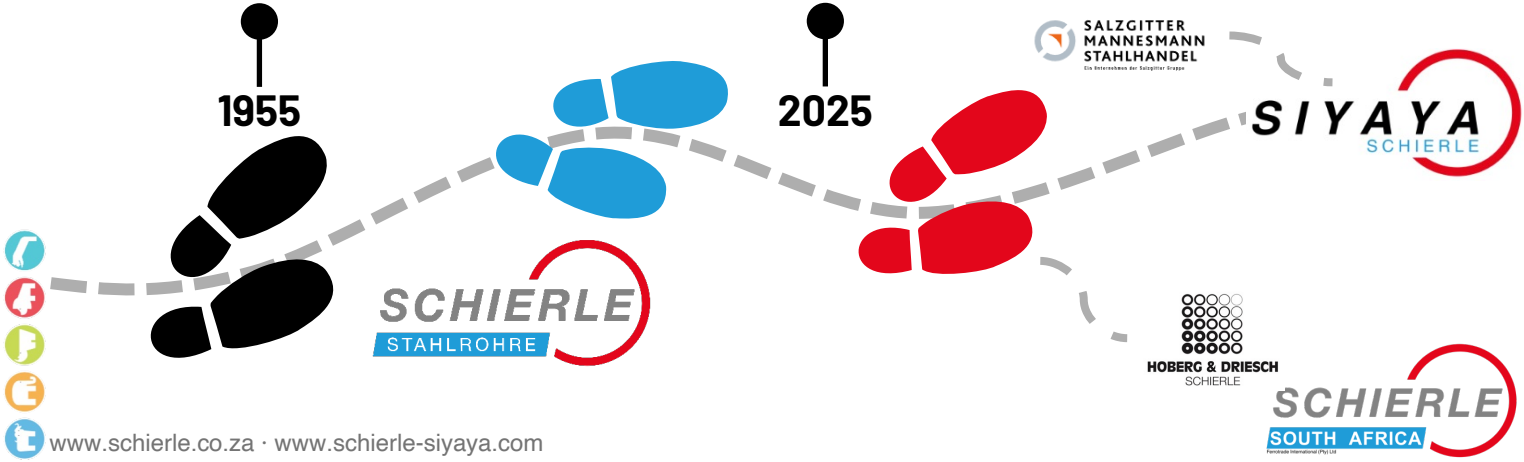

THE SCHIERLE JOURNEY CONTINUES 2025/2026…

TRADITION MEETS INNOVATION

Schierle Siyaya GmbH was founded in 2025 by Marc Schürmann as the next chapter in the long-standing Schierle tradition. Building on the legacy established in 1955 by Eduard Schierle, the company continues decades of experience in steel trading and processing.

Today, Schierle Siyaya focuses on seamless stainless steel tubes, combining proven reliability and flexibility with a modern approach to sourcing and processing. The spirit of Schierle's precision in cylinder tubes and piston rods lives on in the activities of Schierle Siyaya—ensuring continuity of the highest quality standards as the company moves into a new era.

PRODUCTS & SERVICE

360° SERVICE PROVIDER

For 70 years, we have been the **trusted partner** of choice in the **steel precision tube and hydraulics industry**, offering unparalleled expertise and innovation across the entire value chain. Our consulting services are designed to develop strategic solutions, enhance efficiency, and optimize your operations. With decades of industry experience, we assist our clients in making informed decisions based on the latest insights and trends.

We go beyond traditional consulting to offer a comprehensive range of services, including procurement, quality control, storage, and pre-fabrication. Our procurement team selects the highest quality steel products that precisely meet your specifications, while our rigorous quality control procedures ensure performance and durability. Whether it's professional storage solutions or customized processing and manufacturing services, we deliver precision and reliability at every step.

Logistics form the backbone of our company, ensuring seamless execution from start to finish. Our integrated approach ensures that every project is handled with care, speed, and efficiency, minimizing downtime and maximizing value. Over the period of 70 years, we have built our reputation on excellence, trust, and results!

KEY FACTS

FLEXIBILITY

Thanks to our capacities & international network, we have the ability to respond to urgent scheduling situations.

Schierle is a stocking distributor and processing company with its own mechanical manufacturing network.

SCHIERLE
SOUTH AFRICA

Supply to renowned cylinder manufacturers and distributors worldwide.

QUALITY

In-house quality control, and we accept no compromises when it comes to quality! That's why we have maintained a certified quality management system according to ISO 9001:2015 since 1994.

FULL RANGE

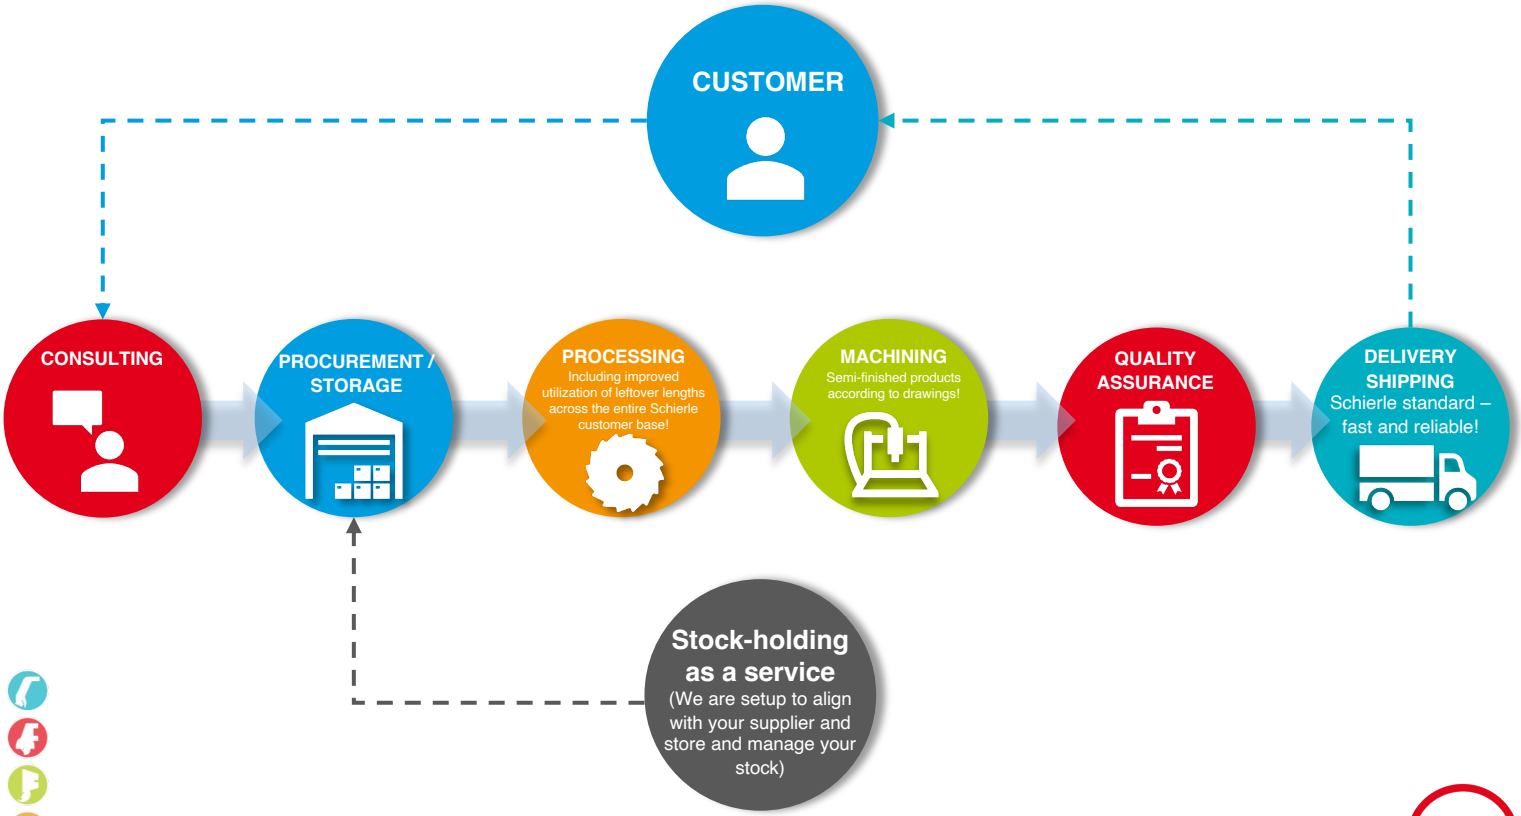

Approximately 200 items that we constantly keep in stock, including those in exceptional dimensional ranges.

SPEED

We collaborate with renowned freight forwarders.

SCHIERLE SERVICE OFFER

SCHIERLE SOUTH AFRICA

SCHIERLE PRODUCT RANGE – HYDRAULIC STEEL

- CYLINDER TUBES
- PISTON RODS
- PISTON TUBES
- HYDRAULIC LINE TUBES
- PROCESSING / MACHINING

THE BIG FIVE

SCHIERLE SOUTH AFRICA

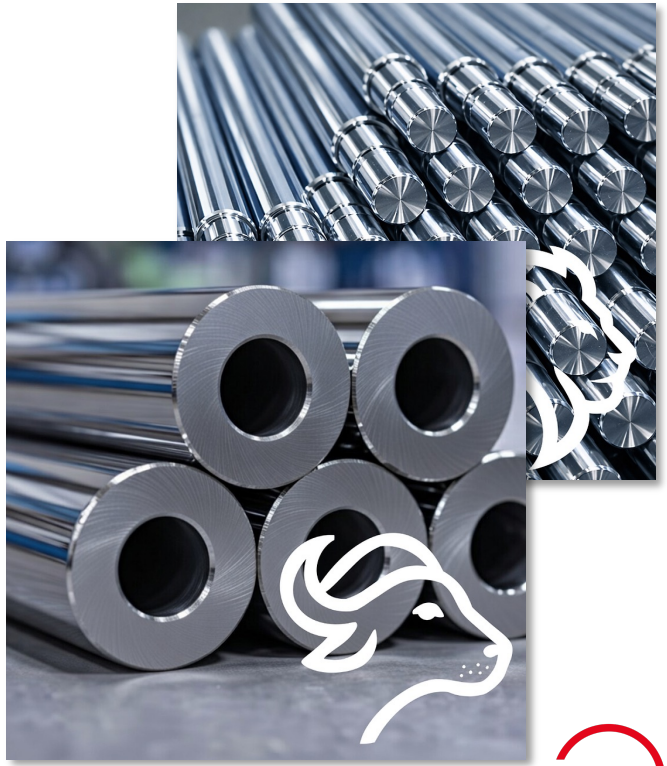

PRODUCT OVERVIEW - CYLINDER TUBES

HP	Seamless Cylinder Tubes, cold drawn	EN 10305-1 (DIN 2391)
HP	Seamless Cylinder Tubes, hot rolled	EN 10297-1 (DIN 1629)
HPG	Welded, cold drawn, rolled Cylinder Tubes	EN 10305-2 (DIN 2393)
HPS	Welded Cylinder Tubes, cold drawn	EN 10305-2 (DIN 2393)
HPI	Cylinder Tubes Stainless Steel	Seamless or welded-drawn
PNA	Aluminium Pneumatic Tubes	Hard-coated, Ra max. 1.0 µm

PRODUCT OVERVIEW - CHROME PLATED PISTON RODS / TUBES

KSV	Chrome plated piston rods
KSH	Chrome plated piston rods, induction hardened
KSNI	Nickel and chrome plated piston rods
KSI	Chrome plated piston rods stainless steel
KRV	Chrome plated piston tubes

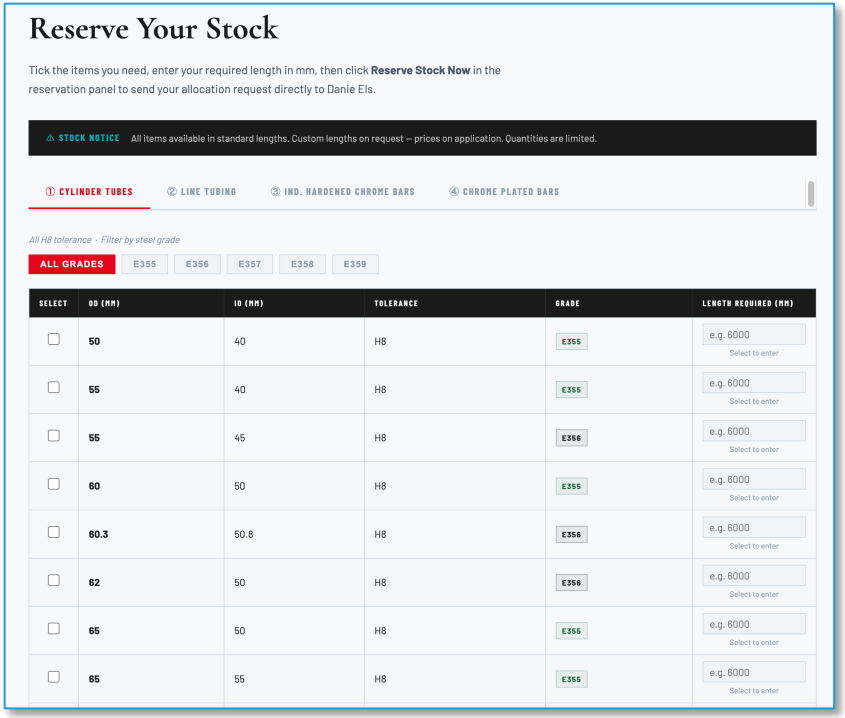

ONLINE PRODUCT OVERVIEW & REQUEST TOOL

Use our **web tool** to explore our NEW stock which arrived in April 2026.

On a regular basis we are receiving shipments of stock from Europe and Asia.

If your product requirement is not listed, then contact us and we will add it to the shipment.

SCHIERLE SOUTH AFRICA

SCHIERLE PRODUCT RANGE – MACHINING

UNITING STANDARD STEEL PRODUCTS WITH CUSTOM-MADE PRECISION

What makes Schierle **unique** worldwide is the ability to combine the supply a comprehensive range of steel tubes and rods as commercial goods with custom-made components tailored to customer specifications and drawings for a wide range of applications.

Our team consists of qualified professionals. Our customers speak with experts on equal footing, and individual requests are quickly and precisely produced by us at highly competitive pricing.

CUSTOM PRODUCTS ACCORDING TO DRAWINGS

Through our network in mechanical manufacturing and partnerships with highly specialised companies, we are capable of producing highly customized special products according to technical customer specifications and drawings, using state-of-the-art machinery.

WORKING WITH SCHIERLE

FERROTRADE - PRODUCTS

Ferrotrade International (Pty) Ltd is a leading supplier of premium hydraulic and engineering steel solutions in South Africa.

With over 30 years of industry expertise and the backing of both German steel specialists Schierle Stahlrohre & Schierle Siyaya, we offer a trusted supply of:

- Chrome Plated Bars & Induction Hardened Bars
- Seamless Cold-Drawn Cylinder Tubes
- Hydraulic Line Tubes with Advanced Coatings
- Seamless Stainless Steel Tubes in any grade

Our strategic location in Pomona, Gauteng enables fast, reliable distribution across Southern Africa.

Backed by technical know-how and responsive service, Ferrotrade is your partner in precision, durability, and performance.

BUSINESS STRATEGY

The hydraulic line tubing market in both South Africa and Sub-Saharan Africa is poised for continued growth, driven by the fundamental needs of key industrial sectors such as **mining, agriculture, construction**, and, especially in Sub-Saharan Africa, **oil and gas**.

Plated tubing offers a wide range of corrosion and wear resistance properties depending on the plating material, making it suitable for diverse and demanding applications. Phosphate tubing provides a cost-effective solution with good corrosion resistance and excellent paint adhesion, often used as a pretreatment for further enhanced protection.

The development and expansion of the hydraulic line tubing market are intrinsically linked to the growth and investment within these application markets, necessitating reliable and durable hydraulic,- , process tubing- and instrumentation tubing systems.

A significant repair and maintenance sector exists in both regions, highlighting the ongoing need for servicing and replacing hydraulic components, including line tubing, to ensure operational efficiency and longevity of equipment.

While specific market size and growth rate figures for hydraulic line tubing are not always explicitly available, the trends and projections in the broader hydraulic hose and cylinder markets provide strong indicators of a positive future for this essential component in South Africa and Sub-Saharan Africa.

Schierle South Africa is not only working on providing customers in South Africa with premium products but aims to collaborate with partners in expanding not only our reach in new industrial sectors and regions but support our customers with their expansion strategy.

SUCCESS THROUGH STRONG PARTNERSHIPS

To drive growth and meet the increasing demand of South Africa's hydraulic market, we are expanding our network of strong, long-term partnerships with customers and suppliers of **hydraulic line tubes, cylinder tubes and piston rods**.

As a specialized trader, our strength lies in connecting reliable supply with real market demand. Long-term access to high-quality products, combined with deep market knowledge and strong local relationships, allows us to create opportunities that benefit everyone involved.

A key part of our strategy is the development of **consignment stock partnerships**. By positioning material closer to the market, we can shorten lead times, improve availability and respond faster to customer requirements — while accelerating market penetration for our supply partners.

At **Schierle**, we have never viewed the relationship between customer and supplier as one-directional. **Both are strategic partners.** Over the years, customers have become suppliers, suppliers have become customers, and strong commercial relationships have developed into lasting partnerships.

We believe the greatest opportunities are created when **market access, product expertise and reliable supply come together**.

Partner with us and become part of a strategy designed to grow together in one of the most dynamic and rapidly developing hydraulic and fluid-system markets in Southern Africa.

Schierle stands at the forefront of innovation, precision, and sustainability in the stainless steel and hydraulics industry. With our unmatched expertise, global reach, and commitment to delivering value, we are poised for significant growth and long-term success.

Join us as we continue to set new benchmarks, create lasting partnerships, and shape the future of our industry together.
